

# OUATOR INDUSTRY 250 Gr

**It is available in three different grades, matching three levels of polishing fineness: A, M, MPT.**

Widely used in the Industry Ouator is a remarkable finishing polisher. With three different grades A, M and MPT it achieves a micron accuracy finishing.

- It gives new polished clean aspect and greatly reduces fine scratches.
- It eliminates marks of rust and pitting.
- It removes tough stains.
- It removes oxidation and tarnishes. Renew oxidized painting.
- It gives back a bright sparkling look and offers a long lasting protection against corrosion.

**Ouator is chlorine and silicone free.**

**OUATOR M** is particularly recommended for softer metals: Copper, Brass, Bronze, tin, ... Also for painted surfaces, polished metals, matrix and precision equipments. Its formulation is suitable for uses such as:

- The final finishing of precision parts without changing the gauge and caliber.
- Cleaning and polishing modules and matrices.
- Revision of manufactured articles before their delivery or exhibition.
- Removal of appearance defects.

**OUATOR A** has been especially formulated for Chromiumn Stainless steel, Aluminum, Zamax, ... Has a faster action than OUATOR M, it meets the same requirements but must always be preferred on harder metals and surfaces.

**OUATOR MPT** is suitable for all delicates works on soft or fragile surfaces such as soft precious metals, smooth plastic materials, polycarbonates, optics, ....

It provides a re-polishing finish with micron fineness. Its action is somewhat slower but the polishing is even finer and longer lasting.

OUATOR MPT further and finalize the work started with OUATOR A and OUATOR M.

## User guide:

1. Before using this product dry and degrease objects and surfaces where you will apply Ouator.
2. Take from the bag 3 to 4 cm of cotton wick.
3. Rub Ouator insisting on more oxidized and dirtiest parts proceeding by small surfaces at a time.
4. Wipe with a soft dry cloth before the product applied dries.
5. Use another soft dry cloth to make it shine. Repeat this action if needed.

During its use the cotton and the surface will gradually turn black without the cotton losing its properties.

**OUATOR bring back the brilliant shine and give an effective and long lasting protection.**

**If used on surfaces in contact with food rinse with clear water and dry well.**

### OUATOR est utilisé dans des secteurs d'activité très divers :

- Navy
- Automotive
- Aerospace
- Research
- Plastic injection
- Mold
- Precision mechanics
- Watches
- Jewelry
- Traditional arts bronze
- Foundry
- Musical instruments
- Electronic
- and More...
